

## 2018 – 2019 Biomedical Sciences Academy Required Summer Reading

### 4<sup>th</sup> Year Course - Biomedical Innovation (BI)

*\*Alternative senior courses, in HST, do NOT have a summer reading requirement*

Summer reading will offer an enhancement opportunity to the Biomedical Sciences Academy curriculum. The depth and complexity of these academic readings will offer a deeper understanding of theoretical practices within the field of biomedical sciences. This one summer book assignment will allow you to start thinking ahead about what is to come this year in your academy course, as well as offer opportunities for extension and more meaningful academic discussions and research. This awareness should help to ensure a more successful academy experience for you!

***All summer reading should be completed prior to the first day of school.***

**A test will be given, at the start of the 2<sup>nd</sup> six weeks, over the assigned book.**

#### **Description:**

Sorrel King was a 32-year-old mother of four when her eighteen-month-old daughter, Josie, was horribly burned by water from a faulty water heater in the family's new Baltimore home. She was taken to Johns Hopkins—renowned as one of the best hospitals in the world—and Sorrel stayed in the hospital with Josie day-in and day-out until she had almost completely recovered. Just before her discharge, however, she was erroneously injected with methadone, and died soon after.

#### **Assignment:**

While you are reading, annotations are highly recommended. You are expected to complete 4 online submissions, via a GoogleForm. These will be a formative grade during the 1<sup>st</sup> grading period. Submissions are required once you completely read certain sections/chapters of the assigned book.
